AUSTRALIAN PARTY**

Key Changes with Crocodile Management:

- KAP's **Safer Waterways Bill** addresses the very real issue of Queensland's exploding crocodile population.
- These **increased crocodile numbers affect public safety** and threaten the agricultural, fisheries and tourism industries on which our regional economy depends.
- KAP's Safer Waterways Bill puts greater value on human life than the lives of crocodiles, and seeks to **responsibly reduce the risk of crocodile attacks**.
- It aims to eliminate crocodiles from our waterways that pose a threat to human life, while protecting crocodiles from becoming endangered as a species.
- The Safer Waterways Bill **gives landowners power** to manage crocodiles on their land.
- It would also **legalise crocodile egg harvesting** in Queensland, which has been successfully implemented in the Northern Territory.
- This, among other economic strategies, **encourages the protection and breeding of crocodiles** in areas they are able to live with no threat to human life.
